 Exceed New Capacity of Building

1/30/2012

Notes:

1. Color under school Building field corresponds with the proposed boundary on the map
2. Orange shading in cells are years when the new capacity of the facility are exceeded
3. Capacity for each facility provided by the District - removing mobiles at Sunset Hill, adding capacity at any of the ESL cluster sites, and proposed new facilities
4. Projections are based on the Reside for each of the planning areas that make up the attendance area for each facility
5. 2011/12 Reside Enrollment (Current and Proposed) and Midpoint Projection Enrollment 2012/13 to 2016/17 are the total students in the shown boundary on the map (ESL shown in neighborhood attendance areas created)
6. ESL population has been factored in based on the ESL cluster sites, neighborhood sites - depending on the circumstance could increase or decrease enrollment at a facility - examine Current ESL Students and Proposed ESL Students columns
7. Cordley ESL has the following facilities in its attendance area: Deerfield, Langston Hughes, Pinckney, Woodlawn
8. Hillcrest ESL has the following facilities in its attendance area: Broken Arrow, New Facility, New York, Prairie Park, and Quail Run
9. 2011/12 F/R Lunch % Reside Enrollment is based on moving the ESL students to the facility they would be attending for that service
11. RSP is not recommending any closure of a facility, rather providing data for the community to weigh in on what course of action should be taken
12. ESL students in the cluster site elementary attendance area are not broken out in the Table (Current Bndry ESL students and Proposed Bndry ESL students)
