It's your child's biggest transition since kindergarten and it can be daunting for both you and your child, so let us assure you that the counselors at all four middle schools have been working both independently and cooperatively to ensure a smooth transition for each incoming 6th and 7th grade student. We strive to meet the unique needs of each individual child in addition to meeting the needs of the collective student population. A few students may be in need of a specialized one-on-one transition plan while many other students will be served through generalized transition programming. The following list of transition activities is a brief overview of the preparation and planning that has already taken place or is scheduled to happen in the near future.
