

Virtual Bobcat Marathon Club

Due to COVID-19 restrictions, this year's Marathon Club will be **virtual**. While we can't gather together for weekly runs, we encourage all kindergarten through fifth grade students to focus on fun and fitness by signing up for our virtual marathon club.

1. How do students sign up for the Bobcat Marathon club?

Parents/guardians, go to <https://www.eventbrite.com/e/bobcat-marathon-club-2020-2021-tickets-123511248469> to sign your child (or children) up. On the Registration page, select the number of tickets. Each child needs a ticket. Then, enter a parent/guardian's name in the "Contact Information" field and your child's name in the "Ticket Info" field.

2. How do I submit my child's (or children's) miles?

Simply keep track of the number of miles each child completes and submit it to bobcatmc@yahoo.com. This is the same process we have used in previous years to capture "outside miles." The only difference is every mile this year is an "outside mile."

3. Are you giving out prizes this year?

We will be giving a Marathon Finisher shirt to every child who completes 26.2 miles by the end of the school year. Shirts will be distributed to all finishers in May.

4. What if my child wants to run/walk more than 26.2 miles?

Tell them to keep going! Although we are only giving out a prize for the first marathon this year, students are welcome to log as many miles as they like throughout the entire school year. Simply email us the miles they run and we'll keep track of the total.

5. Where can my child run/walk their miles?

Marathon Club Miles do NOT need to be completed in Devictor Park. Feel free to choose an appropriate and convenient location for your family. Walking the dog around your neighborhood, jogging with your child in a local park, and even running on a treadmill can all count towards their marathon club miles. **Please do not run/walk in large groups. Always follow applicable COVID-19 prevention guidelines.**

6. How far is a mile?

You may use a time estimate if you're not sure of the exact distance. One mile equals about **10 minutes of running** or **20 minutes of walking**.
