

COVID-19 Guidance for Vaccinated Kansans

Two weeks after you receive the completed COVID vaccine dose(s), (i.e., ≥ 2 weeks following receipt of the second dose in a 2-dose series, or ≥ 2 weeks following receipt of one dose of a single-dose vaccine), the following will apply.

Isolation and Quarantine

Vaccinated persons with an exposure to someone with suspected or confirmed COVID19 are not required to quarantine if they meet all of the following criteria:

- Are fully vaccinated (i.e., ≥ 2 weeks following receipt of the second dose in a 2-dose series, or ≥ 2 weeks following receipt of one dose of a single-dose vaccine)
- Have remained asymptomatic since the current COVID-19 exposure

There is currently no time limit on how long fully vaccinated persons are considered immune. Persons who do not meet both of the above criteria should continue to follow current quarantine guidance after exposure to someone with suspected or confirmed COVID-19. Fully vaccinated individuals do not have to quarantine after exposure to COVID-19 as long as they remain without symptoms. It is recommended by the CDC that fully vaccinated individuals get tested via PCR or antigen test 3 to 5 days after exposure to a suspected or confirmed case of COVID-19 even if they do not have symptoms with an additional recommendation by KDHE to re-test 7-10 days after exposure. However, they do not have to isolate at home while waiting for results if they do not have symptoms. Fully vaccinated individuals that do not have symptoms do not need to quarantine but should mask while in public indoor settings for 14 days after exposure.

Travel

Vaccinated persons are not required to quarantine regarding travel if they meet all of the following criteria:

- Are fully vaccinated (i.e., ≥ 2 weeks following receipt of the second dose in a 2- dose series, or ≥ 2 weeks following receipt of one dose of a single-dose vaccine)
- Have remained asymptomatic since the travel

There is currently no time limit on how long fully vaccinated persons are considered immune. Persons who do not meet both of the above criteria should continue to follow current quarantine guidance for travel.
