Re: Purchase of Laptop Computers – Lawrence Virtual School

Date: June 8, 2017

Background:

Since opening in 2004, Lawrence Virtual School (LVS) has made technology equipment available to its enrolled families in grades K-12 for the purpose of enabling students to complete online work in their homes. The goal is to provide families with warrantied computers whenever possible so that when issues arise, school downtime is minimized. LVS policy for computer check-out is as follows:

- Grades K-5: One computer for one to three full time students in a family (families of 4 full time K-5 students can check out two computers, etc.) (Caveat: Special Education students can check out computers on a one-to-one basis.)
- Grades 6-12: One computer for each full time student

LVS loans technology equipment on a one-to-one basis for grades 6-12 grades and Special Education because students' online time is greatly increased from the K-5 online requirements.

With each computer purchase from Dell, LVS requests warranties to increase the life of the computers. By purchasing three years of Pro Support and Accidental Damage warranties, computers can be maintained by Dell's third party techs directly in the families' homes within 24 hours of the trouble call. These warranties greatly reduce the downtime associated with computer issues, thus enhancing student success within our program.

Families request computers from LVS by submitting a Computer Request Form and signing an Agreement for Use of Instructional Property which outlines the legal terms for borrowing district technology. This year, the school loaned technology equipment to approximately 60% of its enrollment. LVS currently has 725 computers in the homes of its students across the state. Of those 725 computers, 300 computers are out of warranty and are three or more years old. When a computer is not working and out of warranty in the home, the only option for that student is to swap the computer with another out of warranty machine or, if there are some in stock, a warrantied machine. Currently, our inventory of warrantied computers available to send as a replacement is limited because we strive to equip the families with warrantied technology. The ship time for these computers is two to four days using UPS, meaning the students are unable to utilize the programs from home or they must travel to other locations to do school (e.g. library, friend's or relative's home, etc.), thus, making it difficult for students to remain timely with assignments.

LVS out of warranty computers become useful to the program when, instead of checking them out to families, they are utilized for State Assessment sessions held across the state.

LVS looks forward to replacing non-warranted computers in our families' homes with warranted computers and restocking our State Assessment computers to support state-mandated testing.

Rationale:

USD 497 has sponsored the Lawrence Virtual School over the past thirteen years with computer purchases. LVS requires the replacement of non-warranted computers for families' use to reduce student performance downtime due to breakage and equipment failure. LVS currently supports 300 non-warranted computers in the field which will need to be replaced as soon as breakage and failure occur. LVS also utilizes non-warranted computers for State Assessments across the state.

LVS asks the School Board's approval to purchase 100 three-year warranted Dell Latitude 5580 laptop computers at a per unit cost of \$735 for a total of \$73,500 from General Fund 1810000035-57360.

Recommendation:

Administration recommends board approval for the purchase of 100 Dell Latitude 5580 laptop computers (\$735 each) at a total cost of \$73,500 from General Fund account #1810000035-57360.

Motion:

"I move the Board of Education approve the purchase of 100 Dell Latitude 5580 laptop computers at a total cost of \$73,500."
