Re: JAMF Software Maintenance & Support Renewal

Date: April 20, 2017

Background:

Since the 2013-2014 school year, USD 497 has continued to deploy mobile devices to teachers, staff, and students in order to support additional rollout of blended classrooms, the iPad initiative, and continued progression toward personalized learning for students. A majority of those devices have been Apple products that include Casper Suite Management Software from JAMF Software, LLC.

Rationale:

In order to continue using and managing the Apple products in the district, the Casper Suite Management Software needs to be renewed from JAMF Software, LLC. The annual renewal quote is based on the number of devices that are currently enrolled in the management system. As devices are added throughout the year, specifically for 1:1 rollouts, they are automatically enrolled, then added to the next renewal. JAMF Software, LLC has submitted the annual renewal quote in the amount of \$79,904.

Recommendation:

Administration recommends board approval for the renewal of the annual Casper Suite Management Software through JAMF Software, LLC in the amount of \$79,904 to be paid out of Technology General Fund, Software Services.

Motion:

"I move the Board of Education approve the renewal contract for Casper Suite Management Software with JAMF Software, LLC for \$79,904."
