Re: Board Management System - BoardDocs

Date: August 27, 2018

Background:

Emerald Data Solutions has provided technology solutions since 1989. In the late 1990's, the Company had the foresight to move from providing project based, IT solutions to a then-radical, SAAS model. This strategic change led to the development of BoardDocs®, a revolutionary board management (paperless meeting) solution, first developed in 2000. Currently, the Company is exclusively dedicated to the development and delivery of its fifth-generation, community-defined BoardDocs services.

Current Report:

The report, done by a BoardDocs representative via webinar, will summarize the benefits associated with using BoardDocs. There will also be a live demo/presentation of the software and the representative will answer any questions board officers may have.
