

USD 497 Elementary Curriculum and Resource Timeline

Lawrence Public Schools recognizes the curriculum design process happens in phases and includes a planning, implementation, and review process for each content area, with constant attention to culturally relevant curriculum and sound teaching practices. This schedule outlines the planning and implementation phases for each content area in a five-year window. Revisions to curriculum scope and sequence typically occur one year after the Kansas State Standards are published.

Note: Curriculum Leadership Teams will reconvene after the first full year of implementation to make any revisions to the scope and sequence based on stakeholder input.
