When you receive the alert in green below, click **Class Pages** (in red)

***When you have both elementary students (on Trimesters) and middle/school high school students, it confuses the system. Notice, his schedule doesn't show even when you select **2018-2019** instead of **Trimester**.
2) In **Class Pages**, click one of your students classes

3) In the selected course, click your students name at the top of the screen

4) Now, you should be able to view all the current courses. You may have to repeat these steps when you go back to view your elementary student class pages.
