

Community Outings Permission & Photo Release Form

During this year, we will participate in a variety of community-based instruction. These field trips will allow students to apply and generalize skills learned in the classroom; it will also increase their knowledge of our community, including opportunities to identify potential needs, supports, and avenues of access. Finally, social skill application is a key component to community-based instruction, which will also serve students building friendships.

Opportunities may exist for students to be photographed and/or videotaped participating in activities. If you have further questions, please reach out through email.

Thank you for your support, and we look forward to this school year.
